

SAKETH DONTHA

MS DATA SCIENCE · AI/ML ENGINEER · BUSINESS INTELLIGENCE

(901) 239-7288 | sakethdontha990@gmail.com | Memphis, TN 38111 |
linkedin.com/in/saketh-dontha | github.com/sakethdontha

PROFESSIONAL SUMMARY

Data Science graduate student (GPA 4.0) with hands-on experience deploying production ML systems, building automated BI dashboards, and developing end-to-end data pipelines. Delivered a YOLO object detection model with 94% accuracy in smart appliances, an NLP cyberbullying classifier with 98% F1-score, and Power BI dashboards that boosted recruiter efficiency by 30%. Equally fluent in PyTorch deep learning, LLM-powered RAG pipelines, and executive-level data storytelling — with a proven ability to take projects from raw data to cloud-deployed, business-facing solutions.

EDUCATION

University of Memphis Master of Science in Data Science · GPA: 4.0	Jan 2025 – Dec 2026 (Expected)
National Institute of Technology, India Bachelor of Technology · CGPA: 8.55	Aug 2019 – May 2023

TECHNICAL SKILLS

Languages:	Python, R, SQL, NoSQL, C++, C
ML / Deep Learning:	PyTorch, TensorFlow, Scikit-learn, YOLO, CNNs, CLIP, Transfer Learning, Multimodal Models, XGBoost, Gradient Boosting
LLMs & NLP:	OpenAI GPT API, LangChain, FAISS, Prompt Engineering, RAG, Text Embeddings, Vector Similarity Search
Data & BI:	Power BI, Tableau, Google Analytics (GA4), Google Tag Manager, Qualtrics, Advanced Excel, Statistical Inference
Cloud & DevOps:	AWS (EC2, S3), Docker, GitHub Actions (CI/CD), Azure, Power Automate, Streamlit

EXPERIENCE

Data Analyst Intern Shelby County District Attorney General's Office, Memphis, TN	Jul 2026 – Aug 2026
- Built an automated reporting system that extracts case records from Odyssey division-report PDFs, reconciles them against the JustWare SQL Server database, and generates formatted Excel and PDF deliverables for attorney review. - Cut a review that had taken up to four months down to a day or two, closing a backlog the office had carried for years. Recognized in a recommendation letter from District Attorney General Steve Mulroy. - Wrote layered exclusion rules that narrow a full case load to the under 5% still needing work before final disposition. Unmatched records are highlighted for review rather than dropped. - Built an OpenCV segmentation pipeline for handwritten log sheets feeding a TrOCR recognition model, and prepared the security documentation needed to approve the tooling on county workstations.	

Graduate Assistant — Office of International Affairs

Aug 2025 – Present

University of Memphis, Memphis, TN

- Built automated Power BI dashboards integrating multi-year recruitment, admissions, and scholarship data — improving real-time decision visibility for leadership and increasing recruiter efficiency by **30%**.
- Developed a Power BI dashboard tracking commission rates and contract timelines across **30+ recruitment agencies**, with Power Automate renewal alerts to eliminate missed contract expirations.
- Designed and deployed an internal Faculty Contact Data System integrated with Outlook and Power Automate, streamlining data intake and reducing manual processing for the Office of International Affairs.
- Configured GA4 and Google Tag Manager to track website user behavior; built KPI dashboards summarizing traffic and engagement metrics to support data-driven experience improvements.
- Designed and managed Qualtrics surveys with skip logic and question optimization, exporting results for analysis and dashboarding to support institutional research.

Graduate Engineer — R&D Department

Jun 2023 – Jun 2024

IFB Industries Limited, India

- Developed and deployed ML models (YOLOv8, SVR, Linear Regression) in smart washing machines and refrigerators, enabling adaptive load detection and automated inventory recognition.
- Built an AI-powered refrigerator inventory recognition system using YOLOv8, achieving **94% detection accuracy** and reducing reliance on manual tracking.
- Evaluated model performance using Confusion Matrix, Precision, Recall, F1-score, and Accuracy; automated Excel performance dashboards in Python to audit metrics and present findings to management.
- Conducted patent analysis and literature reviews to identify emerging technologies for smart appliance systems; authored technical reports and internal research summaries.

Placement Coordinator

Jul 2022 – May 2023

Training and Placement Cell, National Institute of Technology, Goa

- Coordinated recruitment operations between students, recruiters, and university management; organized placement drives, networking events, and interview prep sessions for 100+ students.
- Maintained documentation, progress reports, and company communications to strengthen industry-academic partnerships and ensure seamless placement operations.

KEY PROJECTS

Cyberbullying Classification System [GitHub](#) ↗

Python · XGBoost · ANN · Gradient Boosting · NLP

- Built a multi-class NLP system detecting 6 types of cyberbullying using CountVectorizer + LabelEncoder with Random Forest, ANN, XGBoost, and Gradient Boosting. Evaluated with confusion matrices and class-wise metrics.

99% Precision · 98% Class-wise F1-score

YOLO Refrigerator Object Detection [Colab](#) ↗

YOLOv8 · PyTorch · Roboflow · Computer Vision

- Developed a deep learning model to detect and classify food items in refrigerators. Annotated and augmented datasets in Roboflow; applied transfer learning for domain adaptation. Deployed with bounding-box visualizations.

94% Detection Accuracy

End-to-End University Admission Prediction [GitHub](#) ↗

Python · Docker · AWS EC2/S3 · GitHub Actions

- Complete ML pipeline with data preprocessing, feature engineering, and Gradient Boosting regression. Containerized with Docker, deployed on AWS EC2/S3 with GitHub Actions CI/CD for automated retraining on new data.

92% Prediction Accuracy

Anime Recommendation System [GitHub](#) ↗

CLIP · PyTorch · CountVectorizer · Cosine Similarity

- Multimodal recommendation engine combining textual metadata (CountVectorizer + cosine similarity) with CLIP-based image embeddings for semantic matching. Built scalable pipelines to handle large text-image datasets efficiently.

[Multimodal](#) · [CLIP Embeddings](#) · [Vector Search](#)

LLM-Powered Shipment Support Assistant

OpenAI GPT-4 · LangChain · FAISS · RAG

- RAG application using OpenAI GPT-4 + FAISS vector search to answer logistics queries from large document collections. Implemented prompt engineering, text chunking, and LangChain orchestration; evaluated on retrieval accuracy and hallucination rate.

[RAG](#) · [LangChain](#) · [FAISS](#) · [OpenAI](#)

Recruitment Analytics Dashboard

Power BI · Power Automate · Excel

- Integrated multi-year recruitment, admissions, and scholarship data into automated Power BI dashboards; standardized KPIs and funnel metrics, reducing leadership reporting time by 60% and increasing recruiter efficiency by 30%.

[30% Efficiency Boost](#) · [60% Faster Reporting](#)

LEADERSHIP & COMMUNITY

National Society of Leadership and Success (NSLS) — Member
[University of Memphis](#)

Feb 2026 – Present

- Selected by campus administration to join a competitive leadership networking program based on academic performance and demonstrated potential.
- Actively mentor and hold peers accountable within a Success Networking Team of 7 members, fostering a culture of mutual growth and shared accountability.
- Attended workshops and speaker sessions on goal-setting, time management, and personal accountability — applying frameworks directly to managing graduate coursework and GA responsibilities simultaneously.
- Developing strategic communication, collaborative problem-solving, and resilience skills in high-pressure academic environments.

GiveCamp Memphis 2026 — Volunteer Technology Contributor
[Memphis, TN](#)

Mar 2026

- Collaborated with a cross-functional volunteer team to deliver real-world digital solutions for local nonprofits in an intensive 48-hour community hackathon.
- Improved the *Our Youth Memphis* website by embedding outreach intake forms, directly enhancing community engagement and lead capture for the organization.
- Streamlined nonprofit operations by building automated email response workflows for submitted forms, reducing manual follow-up effort for staff.
- Refined website design and usability to improve accessibility and overall user experience for the communities these nonprofits serve.

CERTIFICATIONS

- Machine Learning Specialization — Coursera (Jul 2025)
- Azure Data Fundamentals — Microsoft Learn (Sep 2025)
- Power BI (Jun 2025)
- Tableau (Nov 2024)
- DBMS (Dec 2022)
